#### **Survey Methodology**

Survey by JUST Capital. Methodology: Conducted by The Harris Poll, June 8-9, 2020 and based on 1,009 online interviews. Sample: National online adults ages 18 and older.

Respondents are selected among those who have agreed to participate in The Harris Poll surveys. The data is weighted to reflect the composition of the adult population. Results are weighted for age within gender, region, race/ethnicity, household income, education, employment, marital status, and size of household where necessary to align them with their actual proportions in the population. Propensity score weighting is also used to adjust for respondents' propensity to be online.

Because this survey uses an opt-in, non-probability sample based on those who agreed to participate in the online panel, no confidence intervals or margin-of-error estimates can be calculated.
