1. ABOUT JUST CAPITAL

JUST Capital is an independent, nonprofit 501(c)(3) with a mission to build an economy that works for all Americans by helping companies improve how they serve all their stakeholders – workers, customers, communities, the environment, and shareholders. Since 2015 JUST has polled over 100,000 Americans on their priorities for capitalism and just business behavior, and has collected five years of corporate ESG performance data based on those priorities. Our research and index work routinely demonstrate the business and investor case for just business behavior and is being used to support active and passive products, customized trading strategies, and thematic approaches. Over the past 12 months, JUST's investment-related work has been featured on CNBC, The Wall Street Journal, The New York Times, Fortune, Forbes, Fast Company, Barron's, Institutional Investor, Bloomberg, the Financial Times, and more.

IMPORTANT REFERENCES

This document defines the calculation methodology of the JUST 100 Index (JUONE), an investable equity market index designed, sponsored, and owned by JUST Capital, based upon its annual Rankings of America's most just companies. Each year, JUST Capital evaluates America's largest publicly traded corporations, producing a ranking that reflects how well each company measures up against the American public's definition of just corporate behavior. JUST Capital released its inaugural rankings on November 30, 2016, and updated rankings are released annually in the 4th quarter. JUST Capital will continue to update those rankings on an annual basis, and make them available publicly on its website.

The JUONE Index includes the top 100 Russell 1000 companies ranked by JUST Capital in its most recent annual ranking, therefore the JUST Capital ranking methodology is an important reference document for the JUST 100 Index calculation methodology, and this document should be read in conjunction with the JUST Capital ranking methodology, available on its website at <https://justcapital.com/our-methodology/>.

The JUST Capital ranking methodology explains the model that drives the rankings and how the top companies – the JUST 100 – are identified, and therefore how the constituent stocks for JUONE are selected from the Russell 1000 Index universe. This document specifically focuses on index construction methodology issues such as the weighting of index

constituents, constituent additions and deletions, rebalancing, and corporate actions.

JUST Capital has engaged FTSE Russell as Calculation Agent for JUONE and JUONE constituent stocks are a subset of those in the Russell 1000 Index. Accordingly, important elements of JUONE, such as the definition of the underlying Russell 1000 universe of stocks and treatment of corporate actions, follow the methodology of FTSE-Russell for non-Market Cap Weighted Indices. As such, the Russell U.S. Equity Indexes Construction and Methodology documents, available on <http://www.ftserussell.com/> and linked to [here](#) are also referenced.

As both the JUST Capital ranking methodology as well as the Russell index methodology are subject to change over time, the JUONE Index will incorporate the latest JUST Capital ranking methodology at the time of its annual reconstitution and changes to the Russell methodology will be reflected as they come into effect.

3. INDEX CALCULATION METHODOLOGY

3.1. ELIGIBLE SECURITIES

The eligible securities for the JUST 100 Index are defined as the constituents of the Russell 1000 Index.

3.2. RECONSTITUTION SCHEDULE

The JUST 100 Index is reconstituted annually on the third Friday of December (or next available trading day), the Reconstitution Date.

3.3. SELECTION OF CONSTITUENT STOCKS

On its Reconstitution Date, the JUST 100 Index (JUONE) is reconstituted with a new basket of constituent stocks defined as the top 100 stocks on the most recent publicly available JUST Capital ranking.

Where a company with multiple share classes in the Russell 1000 is selected for inclusion in the Index, all such share classes are included in JUONE.

3.4. WEIGHTING OF CONSTITUENT STOCKS

On the JUONE reconstitution date the selected JUONE constituents from section 3.1 are reweighted so that weight in the JUONE Index will be equal.

3.5. TREATMENT OF CORPORATE ACTIONS

The treatment of corporate actions in JUONE follows the FTSE Russell methodology for Non-Market Cap-Weighted indices, per the published FTSE Russell Methodology. For clarity, below is the summary treatment of spin-offs and mergers in JUONE that may differ from the Cap-Weighted Russell 1000's treatment given that the stocks included in the JUONE are a subset of those in the Russell 1000.

SPIN-OFFS:

- **Parent company is Russell 1000 constituent, but not a JUONE constituent.** Spun-off company has zero weight in JUONE.
- **Parent company has a non-zero weight in JUONE.** Retain all companies that remain or become Russell 1000 constituents at equal weight as the parent/spun-off company(ies) until the next Russell reconstitution.

MERGERS & ACQUISITIONS:

- **Merger between two JUONE constituents.** The delisted company will drop out of JUONE and the weight for the JUONE constituent that remains will depend on the stock proportion of the deal terms.
- **Merger between a JUONE constituent and non-JUONE constituent.** If the remaining merged company is the JUONE constituent then there will be no change to the weight. If the remaining merged company is not the JUONE constituent, then the JUONE constituent will drop out of JUONE.
- **Merger between two Russell 1000 constituents not in JUONE.** No action.

3.6. CONSTITUENT ADDITIONS AND DELETIONS

Additions: Other than as a result of spin-offs as detailed in section 5.3, constituents may only be added to JUONE on its Reconstitution date, based on the latest JUST Capital annual rankings. Constituent additions to the Russell 1000 as part of its June reconstitution are not eligible for inclusion in JUONE until its next reconstitution.

Deletions: Constituent deletions from the Russell 1000 at its June reconstitution, if also present in JUONE, will be removed from JUONE concurrently with their removal from the Russell 1000.

3.7. CHANGES TO JUST CAPITAL CORPORATE RANKINGS

In the event that JUST Capital publicly announces an update to its corporate rankings over the course of the year resulting in a JUONE constituent company's rank falling below the top 100 companies, the affected company will be removed from the JUONE Index. The removal will be publicly announced with a minimum of 10 trading days advance notice and the JUONE Index weights of the remaining securities will be rebalanced consistent with section 4.2 above. This rebalance may take place at any time except for the four weeks prior to the March, June, September, and December Russell review periods.

3.8. DAILY CALCULATION

The JUONE is calculated by [FTSE Russell] (the Calculation Agent).

The Calculation Agent is responsible for calculating index levels based on weights and stocks as determined by the Index Administrator using the steps described in Section 4: Index Calculation Methodology.

3.9. INCEPTION DATE

The JUONE has an inception date of March 13, 2019. Index data prior to the inception date is based on backtests (pre-inception performance).

AMENDMENTS AND EXCEPTIONS TO THIS METHODOLOGY

An Index Committee, comprised of JUST Capital employees, is responsible for approving changes to the methodology for the JUST 100 Index (JUONE). This document is updated to reflect any changes approved by the Index Committee. To the extent reasonably practicable, changes to the methodology are publicly announced in advance of their implementation.
